Speaker Guidelines **Commercial Support**

Speakers must complete and submit a BCDS disclosure form prior to their presentation and are required to disclose any financial relationships they may have with a manufacturer of any drug, device, material, equipment or other product they discuss in an educational activity.

Fair Balance

Speakers are required to prepare fair and balanced presentations that are objective and scientifically rigorous. Speakers must disclose to the audience when they are reporting results of industry-based scientific research.

Unlabeled and Unapproved Uses

Procedures in which experimental products or protocols are employed WILL NOT BE ALLOWED.

Presentations that provide information related to non-FDA approved uses for drug products and/or devices must clearly acknowledge the unlabeled indications or the investigational nature of their proposed uses to the audience. Similarly, if products, procedures or devices are employed in which there is no ADA certification or not on an ADA Accepted list for use will NOT BE ALLOWED. Speakers/authors who plan to discuss any of these aforementioned qualifications must advise The Bergen County Dental Society of their intent prior to the delivery of the educational content, so that they may be investigated for appropriateness.

Use of Generic versus Trade Names

Presenters should use scientific or generic names as much as possible rather than brand names in their lectures or enduring materials. Should it be necessary to use a trade name, then trade names of all similar products or those within a class should be used.

Commercial Supporter Influence

Presenters are not permitted to receive any direct remuneration or gifts from the commercial supporter(s) of this activity as it relates to this specific activity, nor should they be subject to direct input from a commercial supporter regarding the content of their presentations.
